

### DESCRIPTION

This machine aims at unwinding the product continuously. A flying splicing unit connects two rolls together at full speed thanks to an adhesive tape.

### PRODUCT BENEFITS

- Several options available
  - Lifting table for roll loading
  - Double unwinding direction
  - Guiding unit
  - Butt to butt splice
- Continuous unwinding
- Easy to use and to maintain
- Optimal safety for the operator C €

### TECHNICAL FEATURES

Parameters	Range
Material width	1 000 - 2 500 mm
Speed	100 - 500 mpm
Roll diameter	Ø 1 250 - Ø 1 500 mm
Roll weight	Up to 4 000 kg
Shaftless	Option
Lifting table	Option
Double unwinding direction	Option

### APPLICATION

- Laminates
- Paper - Film
- Strong material
- Nonwovens
